

# Software Development Team

Ridi Ferdiana  
[ridi@acm.org](mailto:ridi@acm.org)  
Version 1.0.0

# Team Roles?

- Project Manager
- Developer / Programmer
- Architect / System Analyst
- Designer
- Tester
- Technical Writer

# Developer as a key of Software Development

- Developer creates codes
- Codes construct a program
- Programs become a software
- Connected software becomes a system
- Connected system becomes a distributed system

# Developers problem

Lack of motivation

Not knowing where to start

Lacking tools

Convinced you don't have the time

Convinced you aren't smart enough

Worried your weaknesses will be exposed

# Types of Skill on Programmer

- T Skill
- Phi Skill
- Comb Shape Skill

# General Skills for Any Developer

- Software Design (SOLID)
- Knowing tools
  - Source Code Versioning
  - Automatic Build
  - Editors
- Server Configuration
- Database
- Refactoring
- Debugging
- Testing
- Networking

# Developer Metaphors

- Software Penmanship
- Software Farming
- Software Oyster Farming
- Software Construction

# A technology team effectiveness

Domain knowledge and experience

Experience as part of a team

Communications skills

Flexibility with respect to job assignments

Personality traits

# Developer Personality

## Focus of attention

- Introvert
- Extrovert

## Seeking of Information

- Sensing
- Intuitive

## Decision making

- Thinking
- Feeling

## Relationship in the world

- Judging
- Perceiving

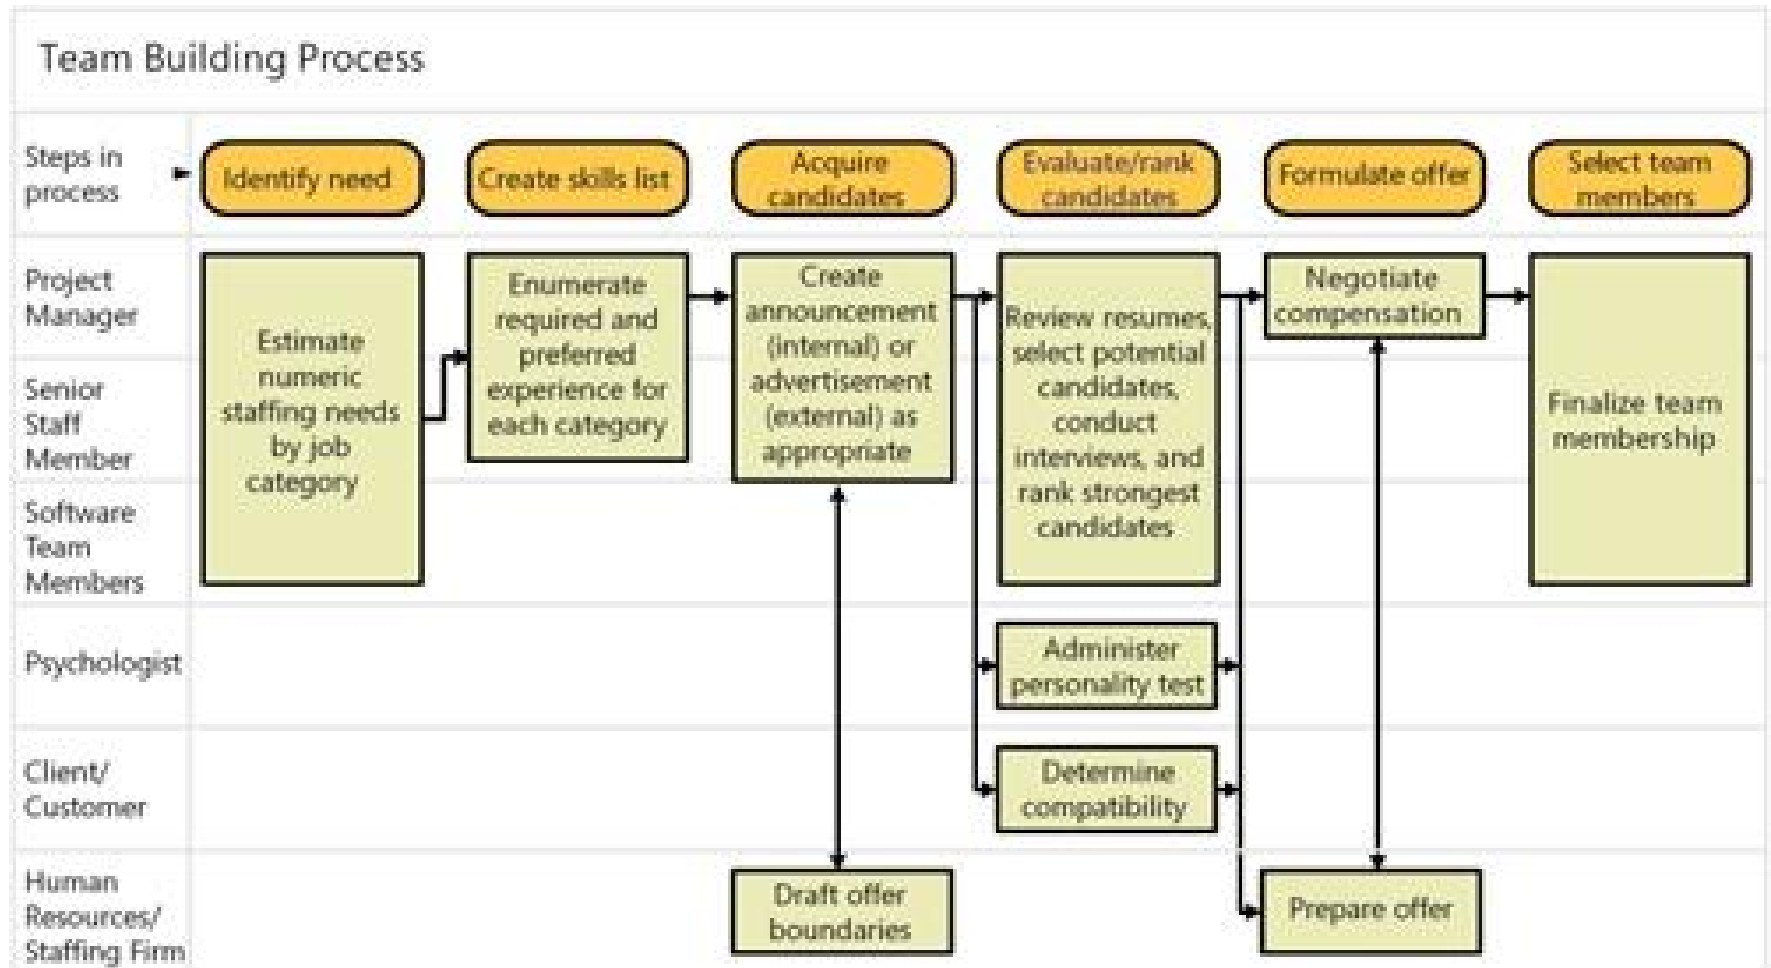

Environment and Genetics

# Developers Team Behavior

Trait	High Extreme	Low Extreme
Dominance	Fearlessly addresses problems directly	Addresses problems methodically, with a plan
Inducement	Outgoing, social, very persuasive	Cautious, reserved, focused on facts
Steadiness	Tends toward secure situations; needs to know boundaries, structured environment	Prefers lack of structure, undefined environment; wants complete freedom
Compliant	Abides by the rules set forth by others; aware of the consequences of ignoring the rules	Sets own rules; prefers "doing own thing"

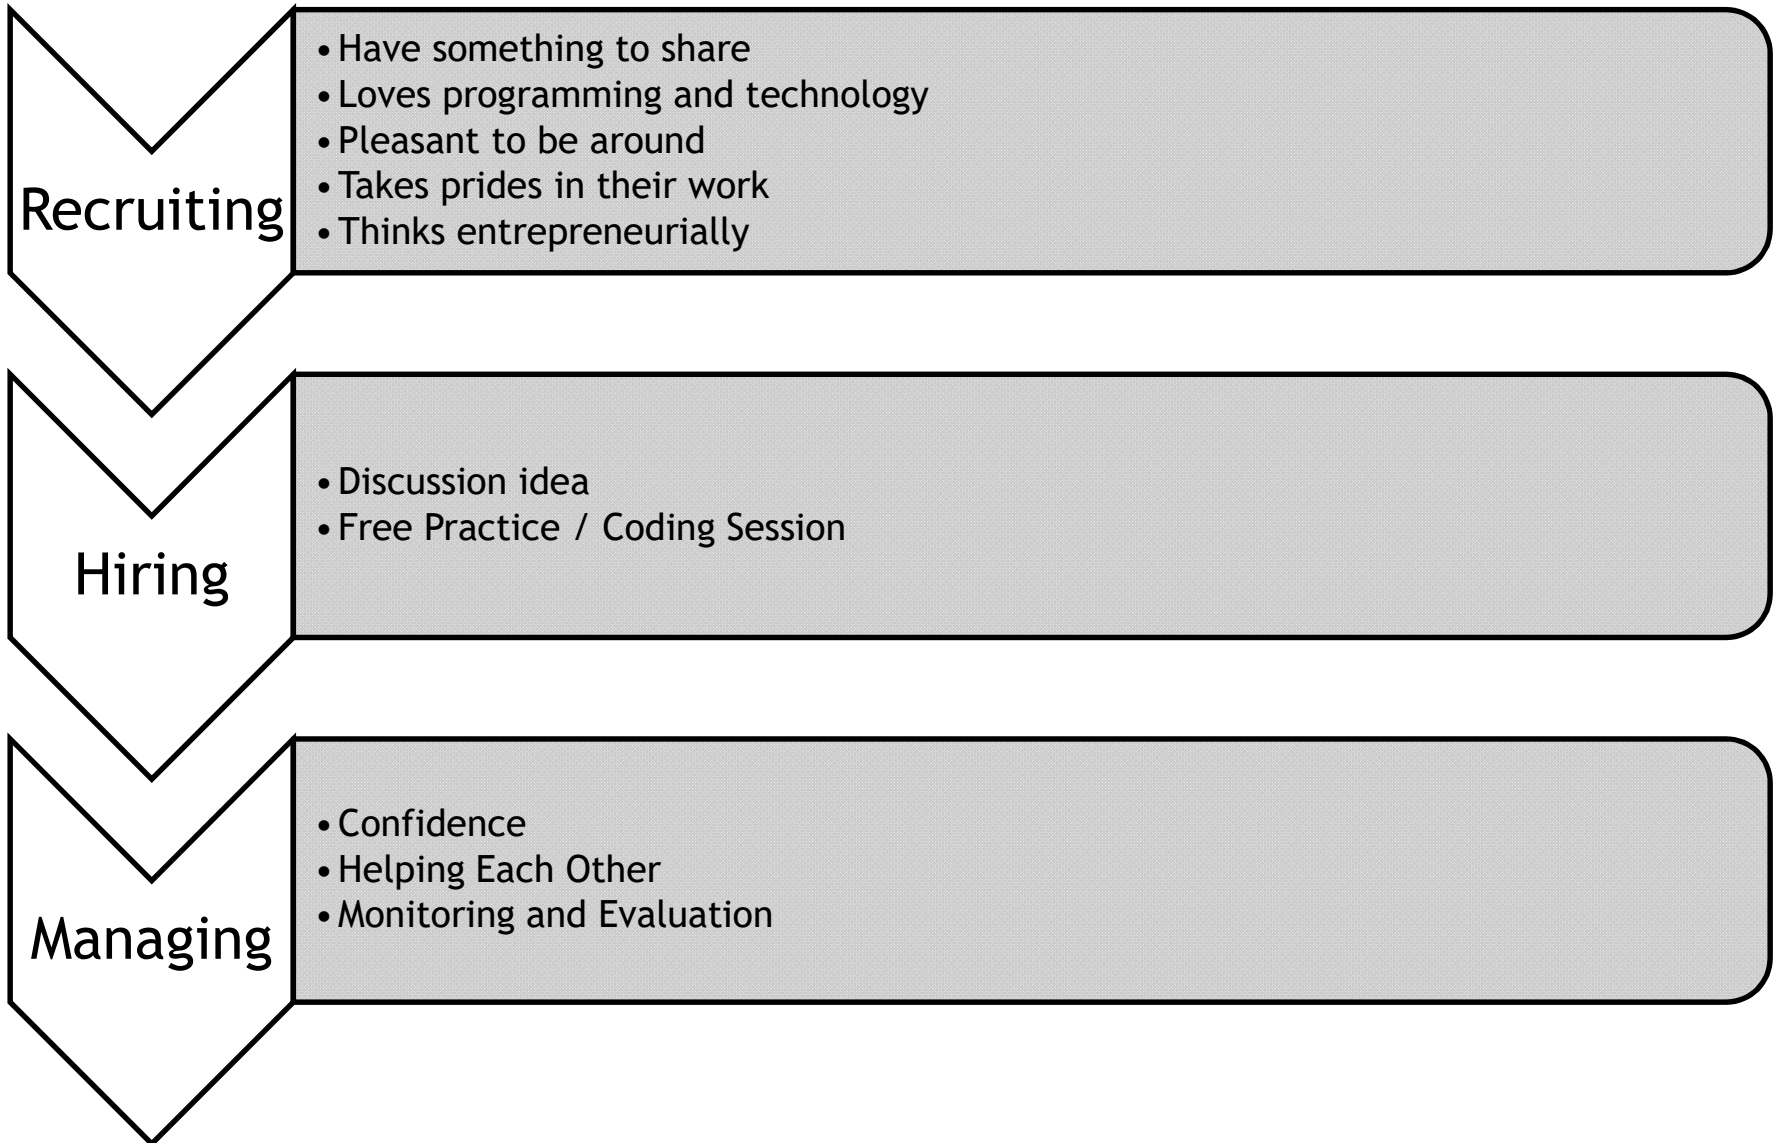

William Moulton (Moulton, 1928)

# Software Development Team

# Composing Software Development Team

(Tyler, 2015)

# Building Jell Team

(Eckstein, 2013)

## ● Composing team model

- Single Site Team
- Multi Site Team
- Dispersed Team

The best architectures, requirements, and designs emerge from self-organizing teams.” (Agile Manifesto, 2000)

## ● Understanding Roles

- Sharing the responsibility

## ● Ensuring Integrity

- Trust and mutual respect
- Communication media
- Customer Communication Facilitator
- Social Connections

# The function of Management

- Management role on software development
  - Program Manager
  - Product Manager
- Functions of Management
  - Planning
  - Scheduling
  - Controlling
  - Staffing
  - Motivating

# Key points

- Developer as a key of software development team
- Manager as a key of software development success
- Developer and Manager Skillsets
- Building a skilful and jell team.
